

## WEBINARS ATTENDED

### Dr. Krishnaraj

- 1.ROAR Day 1
- 2.ROAR Day 2
- 3.ROAR Day 3
- 4.Basic Research methodology
- 5.Basic Research methodology
- 6.Cephalometrics in Perspective: Revisiting some of the most important orthodontic papers
- 7.Aligners- strategies for complex cases
- 8.An overview of OSA
- 9.The Challenge of Non-Surgical Treatment of Skeletal Asymmetry: Case Series
- 10.Can we predict, prevent root resorption
- 11.Digital Diagnosis in Orthodontics 101
- 12.Biomechanics: problem solving for complex orthodontic cases
- 13.Orthodontic treatment for Pediatric OSA
- 14.Vertical Dimension and Facial Aesthetics: Non-Surgical Approaches to Open Bite Treatment
- 15.Non –Surgical Maxillary Expansion In Adults - Facts And Fallacie
- 16.Orthodontic Wires : Using appropriate alloys for different clinical situations
- 17.Clinical Decision making in Orthodontics - Using the evidence
- 18.Maxillary Lateral Incisors Agenesis & implant: Is it really the best solution?
- 19.Class II correction made simple
- 20.Do advances in technology improve Orthodontic Outcomes?
- 21.Welcome to the Golden Era of Orthodontics
- 22.Cone Beam Computed Tomography for Airway Analysis
- 23.Welcome to the new Genomics
- 24.AAA - All About Archwires
- 25.The role of Genetics in Orthodontics
- 26.Bonding - From an exam perspective
- 27.COVID 19 - An Overview
- 28.Cell sheet technology and Periodontal tissue regeneration
- 29.Orthodontic management in individuals with cleft lip and palate
- 30.Stress and burnout in orthodontic personnel

31. Facial aesthetics in passive self-ligation
32. Orthodontics in COVID 19 era: The way forward
33. Alignment and levelling in PEA
34. Basic of digital photography- For orthodontic students
35. Class II treatment- The last word
36. Recent advances, tips & tricks in lingual orthodontics
37. Changes with fixed functional appliances in class II malocclusion: Myth or Reality
38. TMJ considerations in orthodontics
39. An approach to diagnosis of different malocclusions
40. Splint fabrication in orthognathic surgery
41. Where do original research topics come from
42. Alternative application of TADS
43. Replay; Dentofacial aesthetics- from Macro to Micro
44. How to control the vertical dimensions? Biomechanics, growth and geometry
45. Flash online certification programme
46. 3D orthodontics & skeletal malocclusions
47. Online learning and examinations solutions – the need of the hour and beyond
48. Outcomes assessment in clinical Orthodontics
49. Diagnosis and Test development in COVID 19, Cytokine assay – Tool in progress of disease
50. Obstructive Sleep Apnea
51. TADs and LOOPs - Demystified
52. Clear Aligners: What works, What doesn't?
53. Management of impacted canines
54. The 5 components for treating class 2 malocclusion
55. The inhouse aligner masterclass
56. Orthodontic Mini implant
57. Tongue- Role in Non-surgical moulding of face
58. Biomechanics in aligner therapy

**Dr. Dilip S**

59. ROAR Day 1
60. ROAR Day 2
61. ROAR Day 3
62. Basic Research methodology

63. Basic Research methodology
64. Cephalometrics in Perspective: Revisiting some of the most important orthodontic papers
65. Aligners- strategies for complex cases
66. An overview of OSA
67. The Challenge of Non-Surgical Treatment of Skeletal Asymmetry: Case Series
68. Can we predict, prevent root resorption
69. How to practically apply artificial intelligence technology
70. Why we changed the original Roth prescription and developed the NEW Evolution Appliance
71. Digital Diagnosis in Orthodontics 101
72. Biomechanics: problem solving for complex orthodontic cases
73. Orthodontic treatment for Pediatric OSA
74. Vertical Dimension and Facial Aesthetics: Non-Surgical Approaches to Open Bite Treatment
75. Non –Surgical Maxillary Expansion In Adults - Facts And Fallacie
76. Correction of Class II Malocclusion in Permanent Dentition: The Bioprogressive Approach
77. 4th industrial revolution & orthognathic surgery
78. Orthodontic Wires : Using appropriate alloys for different clinical situations
79. Autotransplantation of developing premolars: orthodontic and surgical prespectives
80. Clinical Decision making in Orthodontics - Using the evidence
81. Maxillary Lateral Incisors Agenesis & implant: Is it really the best solution?
82. Class II correction made simple
83. Do advances in technology improve Orthodontic Outcomes?
84. Welcome to the Golden Era of Orthodontics
85. Cone Beam Computed Tomography for Airway Analysis
86. Welcome to the new Genomics
87. AAA - All About Archwires
88. The role of Genetics in Orthodontics
89. Bonding - From an exam perspective
90. COVID 19 - An Overview
91. Cell sheet technology and Periodontal tissue regeneration
92. Orthodontic management in individuals with cleft lip and palate
93. Stress and burnout in orthodontic personnel
94. Facial aesthetics in passive self-ligation
95. Orthodontics in COVID 19 era: The way forward
96. Alignment and levelling in PEA

97. Basic of digital photography- For orthodontic students
98. Class II treatment- The last word
99. Recent advances, tips & tricks in lingual orthodontics
100. Changes with fixed functional appliances in class II malocclusion: Myth or Reality
101. TMJ considerations in orthodontics
102. An approach to diagnosis of different malocclusions
103. Splint fabrication in orthognathic surgery
104. Where do original research topics come from
105. Alternative application of TADS
106. Replay; Dentofacial aesthetics- from Macro to Micro
107. How to control the vertical dimensions? Biomechanics, growth and geometry
108. Flash online certification programme
109. 3D orthodontics & skeletal malocclusions
110. Clinical Orthodontic Club (Case-based discussion)/ Part 17
111. Online learning and examinations solutions – the need of the hour and beyond
112. Outcomes assessment in clinical Orthodontics
113. Diagnosis and Test development in COVID 19, Cytokine assay – Tool in progress of disease
114. Workplace based assessments: OSCEs in dentistry
115. Expanding the lower arch: Is it really a Forbidden Frontier?
116. Malocclusion and its consequences
117. Obstructive Sleep Apnea
118. TADs and LOOPs – Demystified
119. Clear Aligners: What works, What doesn't?
120. Management of impacted canines
121. The 5 components for treating class 2 malocclusion
122. The inhouse aligner masterclass
123. Orthodontic Mini implant
124. Tongue- Role in Non-surgical moulding of face
125. Biomechanics in aligner therapy

**Dr. Sangeetha Duraisamy**

1. Ramachandra Orthodontic Accelerated Review

2.ROAR 2020

3.“Corona times”, Tips and tricks in Lingual orthodontics and clear aligners

4.Master class in orthodontics

5.Surgical orthodontics

6.Anchorage in orthodontics. what are our choices and what's best?

7.“Positioning of obstructive sleep apnea in orthodontics.”

8.Resolution of Impacted teeth

9.Self Ligating System: Philosophy, Evidence and Success.

10.Complexity of class III treatment

11.Fundamentals of orthodontic diagnosis and differential diagnosis

12.Pre-adjusted edgewise system- Improving clinical efficiency

13.Basic research methodology in orthodontics

14.'Effective writing skills for publishing papers in peer reviewed journals'

15.Orthodontics Finish Line Revisited

16.A-Z Lingual orthodontics

17.Dentistry Abroad : Prospects in South East Asia

18.Simplified Orthodontic Biomechanics with Double Slot Bracket"

19.Pre-Surgical Naso Alveolar Moulding

20.“ Digital Diagnosis in Orthodontics 101”

21."Synchronising Forsus with MBT in Class II correction – A clinician’s perspective".

22.MBT MECHANICS- Simplified clinical tips

23.Non-surgical maxillary expansion in adults- Facts and Fallacies

24.Dentofacial aesthetics- from Macro to micro

25.Class II correctors

26. Dental Photography for Orthodontists
27. Management of Class II Div 1 Malocclusion
- 28.
29. Bracket Customization with Lingual Zig and its Clinical Application
30. Orthopaedic intervention of Class III Malocclusions.
31. Conventional to Contemporary planning -in Orthognathic surgery.
32. Non-Surgical Management of Open bites: Smart Mechanics and TADs
33. Expanding Envelope with TADs
  
34. Return to practice , Road Map to your Orthodontic practice during and post covid 19 .A Simplistic approach
35. Variable prescription Orthodontics
36. NaM therapy in cleft Therapy
37. Integrating MB 5.0 in my digital workflow
38. Literature Search & Scientific Management of Scientific writing.by
39. How to write a Thesis
40. Welcome to the Golden Era of Orthodontics
41. Integration of Roth and MBT for the new norm in the time of TSADs
42. Skeletal Anchorage with MAPA Approach : New possibilities in the correction of Maxillary discrepancies
43. Handle with care- to do or not to do
44. How to improve your research metrics
45. Growm modification in Class II cases - Demystified
46. Reducing Uncertainty in Orthodontics: Research vs Snake Oil
47. From Scan to smile , the shift from analog to digital with Invisalign.
48. AAA-All About Archwires
49. Use of Bends and Loops for Refinement of Occlusion.
50. The role of genetics in orthodontics
51. Bonding from an exam perspective
52. The virtually planned and 3D metal printed orthodontic appliance
53. Covid 19- An overview
54. Functional appliance Myth or Reality
55. Cell sheet technology and periodontal regeneration
56. Biomechanics of extra-alveolar tads"
57. Management of patients with Cleft lip and palate.
58. Extraction – Non Extraction controversy

59. Systematic reviews and Meta Analysis Part -1

60. Train the trainers workshop

61. Facial aesthetics in passive self ligation

62. Modified orthodontic protocols- Current Covid Scenario

63. Digital lingual orthodontics

64. Alignment and levelling in PEA

65. Basics of digital photography- For orthodontic students

66. Lingual orthodontics- recent advances- Tips and tricks

67. Treatment of class II with TADs

68. Mini-plate Anchored Class III orthopaedics with control of maxillary & mandibular rotations

69. Changes with fixed functional devices in class II malocclusion- Myth or Reality

70. Finishing in orthodontics

71. TAD use on management of class II management by

72. TMJ considerations in orthodontics

73. Contemporary Dentofacial orthodontics

74. Systematic reviews and Meta Analysis Part -2

75. Train the trainers workshop

76. Laser accelerated orthodontics –Current perspectives

77. Splint fabrication in orthognathic surgery

78. Management of Cuspid Impactions

79. Orthognathic surgery in connection with the invisalign system

80. Biomechanics & Clinical Application of aligner Therapy

81. Bracket prescription ; Its alterations and clinical use

82. Orthodontic preparation For Orthognathic surgery

83. Where do original research topics come from?

84. Biomechanical planning for the correction of vertical malocclusions :the bioprogressive approach

85. The craft of research

86. Active vertical control with TADs in High angle cases

87. The craft of research

88. Fixed functional appliances for class 2 correction , principles and clinical application

89. Relevance of quality of higher education

90. Evolving trends in higher Education

91. Complex camouflage with TADs

92. Orthodontic , orthopaedic & surgical treatment for open bites

93. 3D fully customized printed brackets : the end of Traditional prescriptions

94. How to control the vertical dimension? Biomechanics growth & geometry

95. Current concepts in Dentofacial aesthetics

96. Flash online certification programme

97. Biomechanics with MBT and combination slots – Reinventing the wheel

98. Winning in recovery: Adapting to the new normal

99. The alexander discipline from simplicity to stability

100. Solving third order problems in orthodontics for higher level finishing

101.Orthodontic preparation for surgical Class II Patients

102.Maxillary canine impaction Prevention and management

103.Workplace based assessments: Osces in dentistry

104.Obstructive Sleep Apnea

105.TADs and Loops in Orthodontics

106.IOS international webinar series- "Ortho Illuminati"

-Management of impacted canines

107.-Management of white spot lesions

108.3D Diagnosis and treatment planning, an aesthetic approach to modern biomechanics

109.Management of class III malocclusion

110.Retraction mechanics

111.Biological and biomechanical orthodontics

112.A-Z of publication in scopus – Indexed Journals

113.A-Z of publication in scopus – Indexed Journals

114.Diagnosis and management of white spot lesions in orthodontics

115.Esthetic paradigm in orthodontics

116.Covid - 19 Vaccine types and trials

117.Systematic interpretation of cone beam CT and incidental findings

**Dr. Poornima Jnaneshwar**

1.ROAR day 1- Guest lecture – "Postnatal growth- clinical implications" by Dr. Poornima Jnaneshwar

2.ROAR day 2

3.ROAR day 3

4.Online learning and examination solutions- the need of the hour and beyond – SRM Dental College

5.Workplace based assessment – OSCE – SRM Dental College

6. Malocclusion and its consequences – Dental Council of India
7. Obstructive sleep apnoea - IOS
8. Management of impacted canines by dr. Bhavana Shroff – IOS
9. Treatment of cleft lip and palate by Dr. Snehalatha Oberoi – SRIHER
10. Orthodontic Archwires by dr. Annamalai - SRM Dental College
11. Genetic basis of malocclusion - SRM Dental College
12. Bonding by Dr. Vignesh Kailasam - SRM Dental College
13. Covid 19 by Dr. Preeti - SRM Dental College
14. Periodontal Regeneration by Dr. Reshmi - SRM Dental College
15. Self ligation By Sanjay Labh - SRM Dental College
16. Post Covid orthodontic care by Dr. SriRengalakshmi - SRM Dental College
17. Alignment and Levelling by Dr. Venkateswaran - SRM Dental College
18. Photography in Orthodontics by Dr. Kuldeep - SRM Dental College
19. Lingual orthodontics by Dr. Kannan - SRM Dental College
20. Fixed functional devices by Dr. Haritha - SRM Dental College
21. TMJ consideration in orthodontics - SRM Dental College
22. Splint fabrication in Orthognathic surgery by Dr. Mukundan.V – SRM Dental College
23. Non surgical expansion in adults by Dr. NRKrishnaswamy - AO
24. GUEST LECTURE Cybernetic theory by Dr. Poornima Jnaneshwar – Chettinad Dental College
25. Fundamentals of orthodontic diagnosis and differential diagnosis – Dr. Stephen Chu
26. Illuminati series – Systematic interpretation of CBCT and incidental findings- Dr. Rumpa Ganguly – UCSF school of dentistry , SanFrancisco
27. Illuminati series – White spot lesions – Dr. Efer Tufeksci
28. Non surgical management of maxillary expansion in adults- Facts and fallacies – N.R. Krishnawamy- Power 2 Reason seminar.
29. Anchorage in Orthodontics- whats best- Dr. Bhadri Thiruvankadachari
30. Obstructive Sleep Apnoea Dr. Rekha Bharadwaj
31. TADS and Loops in orthodontics- Meenakshiammal Dental college – Dr. Dilip and Dr. Arif Yezdani
32. Esthetic Paradigm in Orthodontics – Dr. Iqbal – IDA Metro
33. Evolving trends in Higher education
34. Recent advances – tips and tricks in lingual orthodontics

**Dr. Sushil C**

1. ROAR Day 1
2. ROAR Day 2
3. ROAR Day 3

4. Basic Research methodology
5. Basic Research methodology
6. Cephalometrics in Perspective: Revisiting some of the most important orthodontic papers
7. Aligners- strategies for complex cases
8. Basic Research methodology
9. Basic Research methodology
10. Basic Research methodology
